Eccl 5:12

PREFACE

The author's aim in this work has been to provide a corrected, expanded, and updated English version of C. Brockelmann's *Lexicon Syriacum*[2] for the use of both students and scholars. While this dictionary is widely acknowledged to be the best one ever written for this Aramaic dialect, its extreme brevity, obtuse Latin, and lack of citations for its many textual references make it a sealed book even for professional scholars. It is a dictionary which one cites, but which one does not use for reading Syriac texts.

The computerized indices of the primary textual references and the reverse English–Syriac list are intended to make the book more useful, especially when reading Syriac texts. A computerized version of the dictionary itself is also planned for the near future.

I would like to express my thanks to the following individuals and institutions for their assistance:

Mr. Anton Rubenstein wrote all of the computer programs required to turn the electronic version of the original printed book into a database form from which the indices were generated.

Prof. S.A. Kaufman read large parts of the dictionary and corrected many errors.

Dr. Lisa Maurice translated the Prefaces of Brockelmann and Nöldeke and reviewed my translation of the dictionary.

Prof. E. Birnbaum and Dr. D. Shapiro assisted me with Turkish loanwords.

The library of the Department of Semitics at Catholic University of America, Washington, D.C., extended to me gracious hospitality and aid during the five months (November 2005 – March 2009) that I spent there in order to use their exceptionally rich Syriac collection containing many rare and hard to find items. My work there was greatly facilitated by my assistant, Mr. Jonathan Loopstra, and by the department's librarian, Dr. Monica J. Blanchard.

The National Library of Israel;

The library of Leiden University;

The library of the University of Pennsylvania;

The library of the University of Toronto

The interlibrary loan department of Bar Ilan University Library.

The project was supported during a three-year period by a grant from the Israel Science Foundation. J. Loopstra's work was supported by the Comprehensive Aramaic Lexicon Project.

Fortunately, this project was begun after the completion of the digitalization of a large number of rare Syriac books undertaken jointly by The Catholic University of America, Beth Mardutho: The Syriac Institute, and Brigham Young University, which allowed me to acquire

a large personal collection of Syriac books. Additionally, I have availed myself of many other rare Syriac books which have been scanned by various organizations and individuals and have been placed freely on the Internet.

A few words are in order concerning the production of the book itself. Advances in computer programs over the last decades have considerably diminished both the time and cost of multilingual typesetting and improved its quality. The entire text of the dictionary was input by the author using the Israeli English-Hebrew version (ca. 1986) of the DOS wordprocessing program Nota Bene ('Shapirit'), converted by the author into a multilingual version. The resulting dictionary files were then imported into an especially adapted version of the Windows desktop publishing program TAG. I should like to thank Mr. D. Weissman, the author of the TAG program, as well as the late Mr. S. Guttman, who designed all of the fonts used in this book, for all of their assistance.

Finally, I would to express again my everlasting gratitude to my wife, Simone, who has been my faithful עֵזֶר כְּנֶגְדִּי, enabling me to devote myself to research in Aramaic lexicography over the past thirty years.

INTRODUCTION

1.1 The Beginning of Syriac Lexicography in Europe

1.1.1 The beginning of Syriac studies in Europe in the 16th century was part of the revival of humanistic learning of the time, and from its inception, it was furthered by the presence of Lebanese Maronites who had come to Rome.[1] The first important Syriac book to be printed in Europe was the New Testament, published by the Viennese humanist, J.A. Widmanstetter in 1555. While a Syriac grammar had already been published in Europe in the 16th century, the first "lexicon" of this language appeared only in 1622.[2]

1.1.2 As an appendix to the London Polyglot Bible of 1657, Edmund Castell (1606 – 1685) published a seven-language dictionary of the vocabulary of the languages of the texts contained in it, which included the Pešiṭṭa versions of the Old and New Testaments. From this Syriac material, J.D. Michaelis (1717-1791) published the first modern Syriac dictionary in 1788.[3] Michaelis did not limit his dictionary just to the vocabulary collected by Castell, but he also selectively included Syriac words from non-biblical sources[4] without giving exact references to them. The dictionary is ordered by roots and also contains some comparative material derived from Arabic and Greek.[5] Until the completion of the first edition of Brocklemann's dictionary over a century later in 1895, Castell's dictionary served students and scholars as the only complete dictionary of Syriac.

1.2 The *Thesaurus Syriacus* of R. Payne Smith[6]

1.2.1 A turning point in the history of Syriac lexicography took place at the beginning of the 19th cent., shortly after the appearance of Michaelis' dictionary, when several scholars independently began to systematically collect material for a new and more complete Syriac dictionary. The excerpted material was drawn from the limited number of printed Syriac books and catalogs available at the time as well as from manuscripts in various European libraries. The major scholars were:

1 See: W. Strothmann, *Die Anfänge der syrischen Studien in Europa*, Wiesbaden 1971.

2 See: G.B. Ferrari, *Nomcnclature Syriacus*, Rome 1622. This work contains some words which Ferrari apparently found in various Vatican manuscripts, and for which later lexicographers do not have any other attestation. They are cited in the later lexica under the rubric 'Ferr'.

3 See: J.D. Michaelis, *Lexicon Syriacum*, Göttingen 1788.

4 E.g. Bar-Bahlul's lexicon, the Roman edition of the writings of Ephrem, words taken from Ferrari's list; etc.

5 Like Ferrari's pioneering list, this work also contains words which the author apparently found in texts for which no other attestation is known.

6 For what follows, see also: S.P. Brock, 'Syriac Lexicography: Reflections on Resources and Sources', *Aramaic Studies*, 1 (2003), pp. 165 – 178

1. The French orientalist, S.M. Quatremère (1782-1857), who dealt mainly with Arabic and Persian. He utilized Syriac manuscripts available in libraries in Paris.

2. The German Syriac specialist, Georg Bernstein (1787-1860). This scholar published many articles on Syriac lexicography in the *ZDMG* during the first half of the 19th cent., a glossary to a chrestomathy of Syriac texts,[7] and one fascicle of a planned Syriac dictionary.[8]

3. The Anglican minister, Robert Payne Smith (1818 – 1895), Dean of Canterbury Cathedral for 24 years. All of the material which had been collected by the previous scholars[9] was eventually handed over to him. He edited it, added much of his own material, wrote the entries, and – starting in 1868 until his death in 1895 in the middle of the letter *šin* – published it in fascicles as the *Thesaurus Syriacus*. The work was completed by his daughter Jessie Payne Smith in 1901.[10]

1.3 The Need for a New Syriac Dictionary

1.3.1 In the bibliography to his book, *Aramäische Pflanzennamen,*[11] I. Löw writes:
“C[astelli, Lexicon Syriacum], bisher das einzige syrische Wörterbuch, citire ich nicht überall, bitte aber immer anzunehmen, dass ich ihn eingesehen habe. Meist berichtige ich ihn stillschweigend. Wie nötig ein kurzgefasstes syrisches Glossar wäre, ersieht man aus dem Umstande, das C in einem ant. Cataloge jüngst mit 45 Rmk. angesetzt war. Neben dem teuern, schwer vorwärtsschreitenden PSmith’schen Thesaurus würde sich ein gewissenhaft gearbeitetes Glossar in usum tironum einen Platz sichern und würde das Studium des Syrischen wesentlich erleichtern.”

1.3.2 When Löw was writing these words in 1881, the first volume of the *Thesaurus Syriacus* covering the letters ܐ to ܠ had appeared,[12] but it would not be until 1901 that the entire dictionary would be completed.[13] However, as he intimated, the sheer volume of the dictionary – to say nothing of its price – put it completely out of reach of the ordinary student of Syriac who needed a more concise dictionary suitable for a beginner.

1.4 The Work of Carl Brockelmann

1.4.1 The First Edition of the *Lexicon Syriacum*[14]

1.4.1.1 Carl Brockelmann (1868 – 1956)[15] completed his doctoral dissertation in Arabic literature under Th. Nöldeke at Strasbourg in 1890.[16] He remained there to write his *Habilitation*, also under Nöldeke’s direction, while supporting himself teaching classical languages for several years at local Gymnasia. At the beginning of 1893 after having received

7 See: G.G. Kirsch, *Chrestomathia syriaca, cum lexico denuo editit G.H. Bernstein*, 2 vols., Leipzig 1832 – 1836.

8 See: G.H. Bernstein, *Lexicon linguae syriacae*, Berlin 1857.

9 The title page of *PSm* lists several other scholars whose contributions seem to have been less important.

10 See: R. Payne Smith, *Thesaurus Syriacus*, 2 vols., Oxford 1868 – 1901.

11 Leipzig 1881, p. 431. This book was originally a doctoral dissertation written under Nöldeke’s guidance. It has retained its lexical importance to the present day.

12 The first volume was completed in 1879.

13 Viz. six years after Brockelmann had completed his work.

14 See the review of A. Rahlfs, *GGA*, 1895, pp. 755 – 763.

15 I have drawn details about Brockelmann’s life and career for this survey from his autobiographical reminiscences. See: R. Sellheim, ‘Autobiographische Aufzeichnungen und Erinnerungen von Carl Brockelmann’, *Oriens*, 27-28 (1981), pp. 1–65.

16 See: Sellheim, *loc.cit.*, p. 25, n. 26.

an academic appointment, he moved to Breslau.[17] There he began work on *LS*¹,[18] which he completed scarcely two and one half years later when he was merely 27 years old. Unfortunately, in his reminiscences, Brockelmann has little to say about this work.[19]

1.4.1.2 Now fully six years before the completion of the immense *Thesaurus Syriacus*, Brockelmann had completed his own Syriac dictionary which could serve the needs of students as Löw had previously suggested in his book.

1.4.1.3 *LS*¹ was intrinsically different from the *Thesaurus* in the following points:[20]

1. The dictionary included only words occurring in Syriac texts, as opposed to the *Thesaurus* which included all words found in Aramaic dialects written or printed in Syriac fonts, viz. also Christian Palestinian Aramaic, Mandaic, and Modern Syriac.[21]
2. *LS*¹ contained the vocabulary found in the hoard of ancient Syriac texts retrieved from the Syrian Monastery in the Nitrian Desert of Egypt which had arrived at the British Museum in the 1830's and began to be published towards the middle of the century.[22] Brockelmann read all of this new material and excerpted the relevant vocabulary, which included many hitherto unknown words and meanings which were not to be found in the *Thesaurus*.[23]
3. The semantic division of the entries in *LS*¹ was much more detailed than in the *Thesaurus*.
4. The vocalization in *LS*¹ is based on more real data as opposed to the *Thesaurus* where it is based mainly on the author's conjectures.
5. The etymologies in *LS*¹ are much more reliable than those in the *Thesaurus*.

1.4.2 The Second Edition of the *Lexicon Syriacum*[24]

1.4.2.1 Brockelmann again says nearly nothing in his reminiscences about his work on the greatly expanded and completely rewritten *LS*² which appeared in fascicles between 1923 – 1928.[25] It should be recalled that during the period between the appearance of the two

17 *Loc.cit.*, p. 27, n. 27.

18 Nöldeke's preface to the first fascicle is dated September 1894, and Brockelmann's own preface to the completed work is dated February 25, 1895.

19 He merely writes: "Die Verleger meines ersten Buches, des Syrischen Lexikons, hatten mir zwar ein ganz anständiges Honorar gezahlt und mit dem Buch, das in zehn Jahren vergriffen war, kein schlechtes Geschäft gemacht, waren aber kapitalschwach und wagten nicht leicht etwas (See, *op. cit.*, n. 15, p. 32).

20 All of these points are relevant for *LS*¹ and much more so for *LS*².

21 See Brockelmann's comments concerning this in the Preface to *LS*².

22 For the story of this discovery, v. the detailed account given in W. Wright, *CatCambr3*, Preface.

23 Thus, e.g., the Discourses of Afrahat are only excerpted in the later fascicles of the *Thesaurus*. The same is true for the many publications of Syriac texts which appeared in journal articles which are rarely found in the *Thesaurus*. Many of these words were, however, later recorded in *PSmSup*.

The question of Brockelmann's dependence on the *Thesaurus* may also be touched upon here. On the whole, he tends to quote the same examples from OT, NT, SyH, and ES1-3; however, he collected the great majority of his references from his independent reading. Since the last two letters of the alphabet appeared in *LS*¹ before the *Thesaurus*, the references for them were clearly entirely his own.

24 Berlin and Edinburgh 1895.

25 He only refers to it in passing with regard to his dire financial straits in 1945 at the end of the Second World War: "Zum Glück zahlte mir der Verleger Niemeyer ein Resthonorar von 1200 M[ark] für mein inzwischen vergriffenes Lexicon Syriacum." (Sellheim, *op.cit.*, p. 58). In actual fact, mint copies of *LS*² survived the war, and this writer purchased one in 1966.

editions, he was also publishing his immense works on Comparative Semitics, the history of Arabic literature, Ottoman Turkish grammar and lexicon, a history of the Semitic peoples, grammars of Syriac and Arabic, as well as many articles.[26] One is indeed amazed at how one scholar working alone could have accomplished all of these tasks.

2.0 The Difficulties in Employing *LS*[2]

2.1 The Use of Latin as the Target Language of the Dictionary

2.1.1 Following the tradition of his predecessors in Semitic lexicography of the nineteenth century,[27] Brockelmann composed both editions of *LS* in Latin.[28] However, since for most present-day users, the Latin of *LS*[2] is an insurmountable barrier to its use, in practice the dictionary is rarely employed.[29]

2.1.2 Moreover, it was apparent even to Brockelmann himself that many of the Latin words employed in the dictionary definitions would be unclear even to those knowledgeable in this language, and so he included in *LS*[1] English (sic !) glosses for many of the words.[30] For unspecified reasons, these glosses were completely eliminated in the second edition,[31] where, however, he occasionally gives German glosses.[32]

26 For his bibliography, see: J. Fück, *Wissenschaftliche Zeitschrift der Martin-Luther-Universität Halle-Wittenberg, Halle/Salle, Ges.Sprachw.* 7,4 (1958), pp. 857 – 876.

27 E.g. Gesenius, Dillmann.

28 There was a practical reason for employing Latin. In the Introduction to *LS*[2] (p. iv) Brockelmann writes: “Even now the dictionary is written in Latin against my better judgment, so that the book will be accessible also to those outside of Germany. Many matters could have been presented in the vernacular more easily and more clearly.”
In spite of the widespread knowledge at the time of Latin among students and scholars, the following two quotations from two 19th cent. scholars are revealing with regard to the use of Latin in Oriental studies even at that period:

1. “J’ose espérer qu’on me pardonnera quelques fautes de français qu’il est presque impossible à un étranger d’éviter. Peut-être m’eut-il été plus facile d’écrire en latin, mais le sujet s’y opposait, car, en me servant de cette langue, j’aurais dû expliquer des mots arabes par des termes empruntés à l’antiquité romaine, dont le véritable sens ne nous est pas toujours connu aujourd’hui” (R. Dozy, *Dictionnaire détaillé des noms de vêtements chez les Arabes*, Amsterdam 1843, p. viii).

2. “It is hoped that every foreigner will kindly excuse, and every German approve of, my having written the book in German: to write a Grammar in Latin is restricting and troublesome, and to read it is a pain” (A. Dillmann, *Ethiopic Grammar*[2], translated by J.A. Chrichton, London 1907, p. X).

29 It may also be noted here, that Greek terms borrowed into Syriac are often only rendered in this language, without even a Latin gloss. Today, most students and scholars rely on the much less accurate Syriac dictionary of J. Payne Smith, *A Compendious Syriac Lexicon*, Oxford 1903, an abridgement of the *Thesaurus Syriacus*, and quote *LS*[2] as a demonstration of their scientific acumen.

30 The English glosses number in the hundreds, and the present writer has been unable to determine the criteria for choosing the words to be translated. The following are a random selection of glosses from the letter *ålaf*: ܐܒ̈ܠܢܝܐ mourning [p. 2]; ܐܛܐܣܝܐ monsoon [p. 8]; ܐܢܣܘܢ copy [ib.]; ܐܘܟ݂ܦܐ packsaddle [p. 10]; ܐܦܘ̈ܣܛܘܠܝܩܘܢ purgatives [p. 22]; etc. The reason for using English and not the expected German may be attributed to the fact that *LS*[1] was co-published by the British firm T. & T. Clark.

31 This is possibly because *LS*[2] was published solely by the German publisher Max Niemeyer. Indeed, this was not the only useful aspect of the first edition which was eliminated from the second one. The other two are: 1. The Syriac words in the Latin-Syriac index [v. *LS*[1], pp. 405 – 487]; 2. The Analytical Index [v. ib., pp. 487 – 488] which lists those words whose roots are difficult to discern from their form.

32 These are mostly found in the second half of the book. E.g. ܠܫ̈ܢܐ Kladde [p. 363]; ܣܘܡܦܘܛܘܢ

2.1.3 It goes without saying, that today the use of Latin in a modern dictionary of a Semitic language makes it a closed book for nearly all users.

2.2 The Organization of the *Lexicon Syriacum* according to Roots[33]

2.2.1 Following the tradition of Semitic lexicography, *LS*[1] was arranged according to roots and not alphabetically as is customary today,[34] making its usage difficult for most contemporary users and students. Moreover, Brockelmann's etymological considerations often place words where even a modern trained Semitist would hardly think of looking for them.[35] This is further complicated by the fact that the many Greek loanwords in Syriac were also listed alphabetically according to putative triliteral roots based on their first three consonants, compounding the difficulty in locating them.[36] Since *LS*[2] contains nearly no cross references, finding a word when its root is opaque can often be daunting for the user.

2.3 Absence of Citations of Textual Citations

2.3.1 Brockelmann appears to have been obsessed by the need to keep his work contained in the framework of a *Handwörterbuch*. As a result, *LS*[2] contains practically no citations. Because of the polysemy of many Latin words, understanding the exact meaning of many of his glosses is difficult in many cases even for those with a knowledge of Latin.

2.4 Lacunae in the List of Abbreviations

2.4.1 A comparison of the list of abbreviations in the present work with that of *LS*[2] will reveal to the reader the large number of primary and secondary bibliographical abbreviations which are missing in the latter.[37]

3. Previous Attempts to Present *Lexicon Syriacum* in the Vernacular

3.1 As was noted previously, Brockelmann himself would have preferred to have written his dictionary in German, but deferred since at the time this language was less known than

Beinwell [p. 482]; ܣܘܥܪܢܐ Heimsuchung [p. 488]; ܥܐܕܐ ܕܗܘܟܪܐ hoher Tag [p. 522b]; ܡܚܓܪܢܐ Zahnstocher [p. 540a]; ܦܘܡܝܐ Mundvoll [p. 577b, mng. 3]; ܦܪܨܘܦܐ Maske [p. 605a, mng. 2]; ܩܒܠܢܐ Inhalt [p. 640b, mng. 1]; ܣܘܦܩܐ Schleuse [p. 685a]; ܪܘܒܝܢܐ Wachsenlassen (der Haare, der Nägel) [p. 708a, mng. 3, where no Latin gloss is given!]; ܡܬܪܕܝܢܘܬܐ Verkehr [p. 714b, mng. 3]; ܪܗܛܐ Lauf [p. 716b, mng. 6]; ܪܘܚܐ in alle Winde [p. 718a, mng. 1b]; ܪܘܡ af. anheben [p. 721a, mng. 2]; ib. ettaf. beseitigt werden [ib.b, mng. 2c]; ܪܘܡܢܐ Nabe des Rades [p. 731a, mng. 7]; ܪܥܠ ettaf. schlottern [p. 745]; ܫܘܦܢܬܐ [p. 764, mng. 5] Bartstoppel; ܫܘܚܩܐ [p. 770, mng. 7] Gedränge; ܫܘܠܝܐ [p. 780, mng. 2] Entäusserung; ܫܩܪܩܐ [p. 802] Mandelkrähe; ܬܫܘܬܢܐ [p. 812] Spulen; ܕܬܦܬܐ ܕܬܦܬܐ [p. 822] Taille; ܬܘܟܒܬܐ [p. 823] Drang; ܬܠܐ [p. 824] Hochstickerei.

33 See the writer's comments in *Aramaic Studies*, 1 (2003), p. 71.

34 See, e.g., *HALOT*, *CAD*.

35 E.g., the quadriliteral root ܣܪܗܒ was analyzed as a *saf'el* of the root ܪܗܒ [v. *LS*[2] 716], with no cross reference given in the letter *semkhat*.

36 See the comments of Nöldeke and Brockelmann in their Prefaces, translated here in the Appendix.

37 To take an extreme – but not exceptional example – the letter *R* stands for *R*[*aḥmani*], which is missing in the list. The reader is then expected to know that the following reference is to Raḥmani's unlisted edition of the previously cited text. Another case is the commentaries of Barhebraeus to the OT and NT (These are, however, all listed in Br, Gr, pp. 173 – 174). The listing of abbreviations of scientific journals and secondary literature is even more deficient. Were it not for C. Moss, *Catalogue of Syriac Printed Books and Related Literature in the British Museum*, London 1962, and the ability today to search library catalogs online on the Internet, the present writer would never have found many of these abbreviations.

Latin to students outside of Germany.[38]

3.2 In 1963, L. Costaz published his trilingual (French, Arabic, and English) Syriac dictionary which was a greatly abridged version upon *LS*[2] designed for students.[39] While including a large number of the words in the original, the author left out most of the rarer words, eliminated many of the definitions,[40] and excluded all of the textual references and etymological information. Although he kept the original order of *LS*[2] according to verbal roots, Costaz employed a more intuitive internal order for the derived nouns than the one chosen by Brockelmann and gave the Greek loanwords according to their alphabetic order.

3.3 In the early 1990's, as part of the preparatory work for the Comprehensive Aramaic Lexicon (CAL) Project, the late D.H. Hillers of Johns Hopkins University translated the Latin definitions of the vocabulary in the *LS*[2] into English.[41] This translation was utilized for the preparation of the Outline Lexicon of the Aramaic language, i.e. a complete computerized skeleton list of words from the various Aramaic dialects, an internal electronic file used to prepare computerized KWIC (Key Word in Context) concordances.[42]

4. The Purpose of the Present Project – Translation, Correction, and Exapnsion of *LS*[2]

4.1 The genesis of the present project derived from the author's association with the CAL Project, the original purpose of which was to produce a printed dictionary for all of the historical phases of Aramaic, from its earliest beginnings until the Middle Ages, along the lines of the *Chicago Assyrian Dictionary.*

4.2 The two large Aramaic dialect dictionaries which the present author has published, viz. *DJPA* and *DJBA*, exemplify the fact that for corpora of a reasonable size,[43] a single independent researcher with the aid of computer technology can compile a comprehensive dialect dictionary.[44] However, it was clear from the beginning that the immense size of the Syriac corpus made its complete digitalization, lemmatization, and linguistic analysis impossible considering the funding, time span, and staff available for the project.[45] In light of this, the present writer conceived the idea of translating and expanding *LS*[2], and incorporating the material into the CAL as a more practical way of solving the problem.[46]

[38] While this may have been the case for *LS*[1] in 1895, it could hardly have been so for *LS*[2] in 1928. Of course, one must take into account that Brockelmann began working on the second edition many years before its actual appearance.

[39] See: L. Costaz, *Dictionnaire syriaque-français, Syriac-English Dictionary,* قاموس سرياني عربي, Beirut 1963.

[40] This is especially true for the reflexive stems of the verbs.

[41] This project was initiated by Hillers at Johns Hopkins University and has been supported from its inception by the National Endowment for the Humanities. The current chief editor is S.A. Kaufman, Hebrew Union College, Cincinnati [See the url: http://cal1.cn.huc.edu].

[42] While this tool was far from complete and contained many inaccuracies, the present author utilized it as his basic translation. For reasons that are unclear, Hillers only translated those definitions which were given after Arabic numerals, and definitions following letters were not given.

[43] Viz. less than 500,000 words.

[44] *DJPA* was begun in 1979 and utilized software developed specifically for it in the framework of the Responsa Project at Bar Ilan University, Ramat Gan, Israel. It later served as a model for the CAL Project which began in 1987. The present writer‘s later *DJBA* was written utilizing software developed by the CAL project.

[45] However, a start in this direction has, in fact, been made for some important Syriac works, e.g. OT, NT, Afrahat's discources, etc. This material is available on the CAL website.

[46] The work began in 2003.

4.3 Eighty-one years have now passed since the publication of *LS*[2], and the passage of time as well as the accumulated advances in Semitic lexicography, in general, and Aramaic and Syriac studies, in particular, have brought about a need for a more up-to-date scientific dictionary of Syriac. In fact, what is really needed is an entirely new Syriac dictionary based directly on a computerized database derived from an electronic corpus as large and as diversified as possible,[47] but since this goal is not presently feasible, the present work has been undertaken instead.

5.0 The Stages of the Present Project

5.1 Translation of the Dictionary

5.1.1 The writer prepared a complete draft translation of the dictionary from the Latin original. All of the lemmata and glosses were entered into an electronic file.

5.2 **Addition of the Textual References**

5.2.1 All of the references to the primary textual and secondary literature were added to the file. All of the additional entries and corrections in the two Addenda to *LS*[2] were incorporated at this time.

5.3 **Rechecking of the References and the Citations of the Texts**

5.3.1 While working on the translation, it became clear that in order to properly understand the Latin glosses, it would be necessary to check the original citations in their context. Since this facet of the work required examining the original Syriac texts, the writer decided to include representative citations from them.[48]

5.3.2 Many of the Syriac texts which Brockelmann utilized for *LS*[2] have now been republished in either critical[49] or later editions.[50] Citations in the older editions have now more

[47] This, is, of course, a task that cannot be accomplished today by one scholar working alone. From a practical point of view, such a goal can only be obtained through a joint international cooperative scholarly effort, since it requires the expertise of a large number of Syriac scholars as well as extensive funding over a long period of time. Indeed, even assuming that the funding were in place, the chances of recruiting the required scholarly workers who would devote their time to such a project is not bright. Over the past few years, the present writer has personally approached several of the leading academic Syriac scholars active today, and while all agreed on the need for such a project, for various reasons none of them was willing to participate. Thus, while such a project is certainly feasible, and both the methodology and computerized software to carry it out exist, there seems to be little chance of its implementation in the near future. Moreover, even if such a project were to be initiated, it is clear that because of its magnitude it could not be completed for many decades. See: T. Falla, 'A Conceptual Framework for a New Comprehensive Syriac-English Lexicon', *FSL*, 1 (2005), pp. 1 – 80.

[48] The writer eventually rechecked over 86,000 primary references contained in the more than 18,300 lemmata, as well as several thousand secondary ones. Approximately 5% of the primary references contained errors of various sorts (e.g., incorrect text abbreviations, volume numbers, pages, or lines) and required much effort on his part to locate the correct references. As a result, their number has been greatly reduced in the present work, and the residual references not eventually found have been marked as [n. fnd.].

It should be pointed here that many text references in *LS*[2] were taken over directly from *LS*[2] without being rechecked, as may be seen from the fact that the same incorrect reference often appears in both editions. On the other hand, the fact there are occasionally correct references in *LS*[1] which are incorrect in *LS*[2] points to deficiencies in proofreading.

[49] A particularly important example is Beck's editions of Ephrem's authentic works.

[50] Many of the newer editions appeared between the publication of *LS*[1] and *LS*[2]. Since Brockelmann took over references from *LS*[1] into *LS*[2], this resulted in the same text's being cited from several different editions. In the

the most part been updated to the newer ones for the benefit of the user.[51]

5.4 **Re-examination of the Etymologies**

5.4.0 One of the important new features of *LS*[2] was Brockelmann's incorporation of etymologies by which he attempted to give not only the sources of the Syriac vocabulary but also to make the work into a partial comparative Semitic dictionary. The great strides in Aramaic studies, in Aramaic and Semitic lexicography, as well as in the study of other relevant languages over the past 80 years have now made this aspect of the work obsolete requiring its complete revision.

5.4.1 Semitic

5.4.1.1 As Brockelmann states in his Preface to *LS*[1], he indicated the Semitic etymology only in those cases in which the originally independent Semitic roots had coalesced in Syriac.[52] Otherwise, he did not give Semitic etymologies. In *LS*[2], he decided to enlarge this aspect of the work and to turn the dictionary also into a comparative Semitic one. Because of the difficulties involved, this aspect of the work has been eliminated in the present edition, with the exception of the coalesced roots.

5.4.2 Akkadian

5.4.2.1 The Assyriologist, P. Jensen, was Brockelmann's advisor for Akkadian in both editions of *LS*. When *LS*[1] was published, no Akkadian dictionary existed at all, while for the second edition, the only dictionary was F. Delitzsch's *Assyrisches Handwörterbuch*, published in 1896. The appearance starting in the 1950's of the two major Akkadian lexicographical projects of the twentieth century, the *Chicago Assyrian Dictionary* (1958 →) and von Soden's *Akkadisches Handwörterbuch* (1959 – 1981), not only revolutionized the field of Assyriology but also made available a vast amount of reliable material for both comparative purposes and for discovering the source of many loanwords. Additionally, *LS*[2] belongs to a period when scholars tended to establish meanings in Akkadian from supposed cognates in other Semitic language and these "Akkadian" words were then employed to show that they were borrowed from Akkadian into other Semitic languages.[53] While many of the Akkadian loanwords were correctly identified,[54] a comparison of all of the supposed Akkadian words in *LS*[2] with the modern Akkadian dictionaries shows that:

1. Some of the supposed loanwords are non-existent.[55]
2. Many of the words which actually exist are incorrectly transliterated by the standards

present work, these references have now been standardized to the latest edition as far as possible. Brockelmann often cites the same text from more than one edition, and the older extraneous references have now been eliminated. Finally, it should be noted that there are many references in *LS*[2] to texts cited from quotations in the older catalogs. As far as was possible, these have been replaced by references to the text editions themselves.

51 The newer editions are given in the List of Abbreviations. Besides making these citations more accessible to the user, it became clear that many citations in the older texts were based either on corrupt manuscripts or on printers' errors, and these have been indicated in the entries.

52 E.g., the root ܥܪܒ.

53 The advances in our knowledge in this field can best be seen by looking at Kaufman, *AIOA*.

54 Cf. the entries in Kaufman, *AIOA passim.*

55 See, e.g.: ܐܝܩܐ (sacred) stream Akk < *iqu* [p. 14b]; ܐܟܦ to take care < Akk *ukkupu* [p. 19b]; ܐܪܓܘܒܠܐ stonemason < Akk *burgulu* [p. 46a]; ܐܫܟܪܝܢܐ perennial box tree < Akk *urkarinnu* [p. 53a; ܒܠܛܝܬܐ wood worm < Akk *balṭītu* [p. 75b]; ܕܘܕܠܐ millepede < Akk *adudillu* [p. 159b]; ܙܝܙܢܐ *lolium spec. L*, weed < Akk *zizānu* [p. 195a]; ܚܕܪ to go around < Akk *adru, adūru* [p. 216b].

of modern Akkadian lexicography.[56]

3. Some loanwords went unrecognized.[57]

5.4.3 Aramaic

5.4.3.1 It is a truism, that the writer of a dictionary of a particular Aramaic dialect should first attempt to place its vocabulary in the framework of the history of this language. The past 80 years have seen the publication of an immense amount of material from the various epigraphic dialects of Aramaic[58] dating between the 10th cent. BCE – 5th cent. CE which has shed much new light on Aramaic lexicography, in general, and on Syriac lexicography, in particular. To choose just one example, the discovery of the Aramaic texts from Qumran dating to the last centuries of the Second Temple Period (3rd cent. BCE – 1st cent. CE) have furnished us with the missing etymological links for several words previously known only from Syriac.[59]

5.4.3.2 *LS*2 reflects the age of Aramaic studies when all dialects written by Jews were lumped together as "Jewish Aramaic",[60] although these dialects belong to both Western and Eastern Aramaic and date from different periods. Through the scholarship of the late E.Y. Kutscher and others, it has become clear that one must clearly distinguish between the different Jewish Aramaic dialects. Unfortunately, comparative Aramaic material written by Jews was generally quoted in *LS*2 in a most cursory fashion, either with the rubric 'AR', i.e. dialectis aramaeis commune, or 'jar' (sometimes spelled 'j.ar.'), i.e. dialectis arameis Judaeorum proprium.[61] Moreover, comparative Aramaic material was generally quoted only for the main entry (e.g. a verbal root) and not for the derived nominal and adjectival forms.

5.4.3.3 For Syriac, a member of the eastern branch of Middle Aramaic, the user should be informed first and foremost of whether a given word exists in the closely related dialects of Jewish Babylonian Aramaic and Mandaic. If not, comparative material should then be sought

56 See, e.g.: ܙܘܝܬܐ corner – for: *ṣ(z)āwītum*, read: *samītu* [p. 190b]; ܙܢܩܐ mint – for *sinqu*, read: *singu* [p. 201b]; ܙܩܝܦܐ erect – for: *ziqīpu*, read: *zaqīpu* [p. 204a]; ܙܪܦܐ impetus – for: *zurub*, read: *ṣurup* [p. 205a]; ܚܡܐܬܐ butter – for: *ḫem(w)etu*, read: *ḫimētu* [p. 208a]; ܚܒܝܬܐ container – for *ḫap(b)ū*, read: *ḫābû* [p. 209b]; for: ܚܨܝܢܐ ax – for: *ḫaṣinnu,* read: *ḫaṣṣinnu* [p. 251a]; etc.

57 See, e.g.: ܓܠܫܐ side < Akk *gilšu* [p. 126]; ܚܙܘܪܐ < Akk *ḫinzūru* apple [p. 226].

58 With the exception of the Syriac texts, the vocabulary of the Northwest Semitic epigraphic texts has been collected in *DNWSI*. The Syriac epigraphic material itself, was practically unutilized in *LS*2 [for the early pagan material, see now: *OSEI*; *DocA*; *DocB*]. The large amount of Christian material has been published in many scattered publications and has not as yet been collected [See: S.P. Brock, 'Syriac Inscriptions: A Preliminary Check List of European Publications', *AION*, 38 (1978), pp. 255 –271]. Other important epigraphic material is to be found in the growing corpus of the incantation bowls [see: M. Moriggi, *La lingua delle coppe magiche siriache*, Florence 2004].

59 An example is Syriac ܚܨܢܐ bosom *LS* 242 which Brockelmann correctly derived from an unattested Aramaic root **ḥʿn*, cognate with H חצן. The Aramaic cognate root חען "to hug, grasp" has now turned up in 11QTgJob 41:9 [See: M. Sokoloff, *The Targum to Job from Qumran Cave XI*, Ramat Gan 1974, p. 164].

60 E.g. the Onkelos-Jonathan type Targums, Jewish Palestinian Aramaic, Jewish Babylonian Aramaic.

61 On inspection, it turns out that on more than one occasion the only source of the comparative Jewish Aramaic material comes from the Jewish Targum of Proverbs (see, e.g. ܗܘܡܡܐ disturbance [p. 144]; ܙܠܝܩܐ splendor [p. 198]; ܚܒܢܢܐ lazy [p. 211]; ܚܠܩܐ hyrax [p. 214]; ܡܩܩܐ admonition [p. 337])] etc.), long known to be a Jewish adaptation of the Pešiṭta to this book! [see, e.g. G. Dalman, *Grammatik des jüdisch-palästinischen Aramäisch*2, Leipzig 1905, p. 34]. Note also that Brockelmann occasionally uses the abbreviation 'talm.' [i.e. JBA], not given in his list of abbreviations (see e.g.: ܒܪܢܐ [p. 96], ܓܠܠܐ [p. 109].

in other Aramaic dialects starting with those which are closest to it both geographically and temporally, and moving further away as need be. Only then, should one turn to other Semitic languages for help.[62]

5.4.3.4 When *LS*[2] was written, the dictionary with the highest prestige for the etymology of Jewish Babylonian Aramaic was J. Levy's four-volume *Wörterbuch* (1876 – 1889),[63] especially since the distinguished Orientalist, H.L. Fleischer, had appended his corrections and etymological notes to it. However, the nineteenth century dictionaries of Jewish Babylonian Aramaic were all based on a textually corrupt foundation, and twentieth century scholarship has now shown that because of this many of their interpretations and etymologies were incorrect.[64]

5.4.3.5 When *LS*[2] was written, no Mandaic dictionary existed, and its vocabulary was only available by means of a direct reading of the texts themselves, something unconducive to extensive citation of this dialect. Brockelmann rarely cites Mandaic words, and then only when they have a special meaning relative to Syriac which had been previously dealt with by scholars such as Th. Nöldeke or M. Lidzbarski. The appearance of the *Mandaic Dictionary* in 1963[65] has changed this situation completely, and comparative material can now be drawn from it extensively.

5.4.3.6 As for the Middle Western Aramaic dialects, the situation has also changed dramatically. The only specialized dictionary for this branch of Aramaic which existed at the time was Fr. Schulthess' *Lexicon Syropalaestinum*,[66] which is rarely quoted in *LS*[2]. There are now modern dictionaries of both Jewish Palestinian[67] and Samaritan Aramaic,[68] both of which can contribute much to Syriac etymology.

5.4.3.7 The Aramaic vocabulary of the Targumim to the Pentateuch (TO) and the Prophets (TJ) was already collected separately in Levy's *Chaldäisches Wörterbuch*.[69] Though the exact date and provenance of these texts is still debated, they are clearly contemporary with Classical Syriac and may be used for comparative purposes.

5.4.4 Iranian

5.4.4.1 Syriac contains Old Iranian loanwords as part of its earlier Aramaic heritage from the Achaemenid Period.[70] Syriac, itself, came into contact with various Iranian dialects during the Middle Persian and Modern Persian periods of this language, and borrowed many words

62 Brockelmann often quotes unique parallels to Syriac words and roots from Arabic material unattested in the lexica (see e.g.: ܐܚܬܪܐ anger [p. 16]; ܐܛܘܦܣܐ shape, mold [p. 24]; √ܒܠܣ to crush [p. 84]; √ܒܪܨ to make clear [p. 96] √ܗܕܣ to consider [p. 172]; etc.). This material should be the subject of a separate study.

63 See: Levy, *TMW.* This dictionary replaced Buxtorf, *Lexicon*.

64 The present writer's *DJBA* incorporates all modern scholarly work in the field as well as comparative material from Syriac.

65 See: Drower and Macuch, *MD*.

66 See: Schulthess, *LSp*.

67 See: Sokoloff, *DJPA*.

68 See: Tal, *DSA*.

69 See: Levy, *TW.* See now also: E.M. Cook, *A Glossary of Targum Onkelos*, Leiden 2008. The Targumim to the Hagiographa are, in general, late works and should not be used for comparative work. They are cited occasionally in this work with the rubric LJLA. Brockelmann subsumed all of the Targumic texts in *LS*[2] under the rubric 'AR'.

70 See e.g. ܦܛܒܓܐ dainty food [p. 563] < OIr *patibāga* Hinz, ASN 185; ܦܬܓܡܐ word [p. 616a] < OIr **patigāma* Hinz 186.

during this time.

5.4.4.2 Brockelmann's source in *LS*² for Iranian loanwords was the pioneering study of P. de Lagarde, published in 1866, which was based mainly on Modern Persian.[71] However, it is clear from the morphological forms of the Iranian loanwords in Syriac, that the majority of them were already borrowed into the language during the Middle Persian period either from Pehlevi or from the Parthian dialect.[72]

5.4.4.3 Fortunately, the entire topic has recently been thoroughly re-investigated by A. Ciancaglini, *ILS*, who has composed an in-depth discussion of the phonology and morphology of these loanwords, as well as a detailed glossary of all of them. This study now supercedes all previous work on the subject.

5.4.5 Greek

5.4.5.1 The huge number of Greek loanwords and calques in Syriac reflects borrowing from various periods during the history of this Aramaic dialect. As A. Schall has shown,[73] their number is quite limited in the early period of Syriac,[74] but later on, especially due to prevalent translation techniques from Greek into Syriac, a flood of loanwords and learned loan translations entered this dialect.[75]

5.4.5.2 As is well known, the Hebrew and Aramaic literature of the Jews of the Mishnaic and Talmudic Periods also contains a large number of Greek loanwords, many of which have counterparts in Syriac.[76] In *LS*², Brockelmann practically never cites this great store of lexical material for comparative purposes which was conveniently available to him in the second volume of S. Krauss' *Lehnwörter*.[77]

71 See: P. de Lagarde, 'Indische, persiche und armenische Wörter in Syrischen', in his *Gesammelte Abhandlungen*, Leipzig 1866, pp. 1 – 119.

72 Thus, the Middle Persian ending *-ak* became *-a* in Modern Persian, but many Persian loanwords preserve the older form. See, e.g.: ܐܣܦܝܕܟܐ white lead (p. 35) < MIr **ispēdāk* < MIr **spēdak* [cf. Peh *spēdag* white (of egg) CPD 76, P *sapedā* PED 653]; ܓܪܡܩܐ < MIr **garmak* [cf. P *garma* hot or white bread PED 1084; Peh *garm* warm, hot CPD 35]; ܙܪܕܩܐ safflower < Peh *zardak* CPD 98); ܛܒܩܐ plate (p. 268) < Peh *tābag* frying pan CPD 81; etc.

73 See: *SUGFS*. While not specifically stated, all of the examples in this book were drawn from *LS*².

74 I.e., up until the 5th cent.

75 On this topic, see especially the contributions of S.P. Brock, e.g. 'Greek Words in the Syriac Gospels (*vet* and *pe*)', *Le Muséon* 80 (1967), pp. 389 – 375; idem, 'Greek and Syriac in Late Antique Syria', *Scripta Classica Israelica*, 15 (1996, pp. 293 – 301. There is as yet no comprehensive work on the late Greek loanwords in Syriac.

76 To choose just a small sample from the letter *ålaf*: ܐܓܘܢܐ struggle < ἀγών [p. 4; see אגון LW 8]; ܐܘܛܪ̈ܢܐ magnates, important people < οὐετερανός [p. 8; אטרון LW 31]; ܐܘܢܓܠܝܘܢ gospel < εὐαγγέλιον [p. 8; אוון גליון LW 21]; ܐܘܣܝܐ essence, being < οὐσία [p. 9; אוסייה LW 24]; ܐܘܩܝܐܢܘܣ ocean < ὠκεανός [p. 9; אוקיינוס LW 25]; ܐܛܪܝܢ vermicelli < ἴτριον [p. 14; LW 225, s.v. הטרית]; ܐܘܟܠܘܣ crowd < ὄχλος [p. 18; אוכולוס LW 18]; ܐܡܒܘܢܐ anvil < ἄμβων [p. 24; אמבון LW 59]; etc.

77 See: Krauss, *Lw.* This volume contains the invaluable additions and corrections of I. Löw. Unfortunately, this book is greatly out-of-date today and has not as yet been replaced. Mention should also be made here of both the works of S. Lieberman (e.g. *Greek in Jewish Palestine*, New York 1942; *Hellenism in Jewish Palestine*, New York 1950) and D. Sperber (e.g. *Dictionary of Greek and Latin Legal Terms in Rabbinic Literature*, Ramat Gan 1984) who utilized Syriac extensively in their research and pointed out many parallels between Greek words which were borrowed into both Syriac and the Jewish Aramaic dialects.

5.4.6 Rabbinic Hebrew[78]

5.4.6.1 An important but nearly untapped source for cognates in Syriac is Rabbinic Hebrew.[79] The various dialects of post-Biblical Hebrew borrowed many hundreds of words from Aramaic, some of which are not otherwise attested in any Aramaic dialect except for Syriac. Due to the fact that the printed editions of nearly all Rabbinic texts are linguistically corrupt, the orthography and vocalization of these words as listed in the Rabbinic dictionaries is no guarantee of their correct form.[80] Correct use of this extensive cognate material based on manuscript sources of Rabbinic texts can be extremely useful for our understanding of Syriac.[81]

5.5 Ordering of the Entries and their Contents

5.5.1 One of the more frustrating aspects for the user of the *LS*² is its extreme ordering of all entries by roots. Moreover, when Brockelmann viewed a verbal root as being denominative, the “original” nominal form was listed as the first entry, while the “derived” verbal forms followed it. Within the root itself, derived words are given according to their association with the various verbal stems, a system whose principles are not entirely clear to the general reader. Derived *šaf‘el* and *saf‘el* stems are quoted under the basic triliteral root.[82] Unfortunately, since *LS*² contains nearly no cross references, this often makes finding the location of a word whose root is unclear to the reader a daunting or nearly impossible task.[83] As for Greek words, since they are generally alphabetized by putative triliteral roots not taking into account the vowel letters, finding them is no simple matter.

5.5.2 Confronted with similar problems of ordering, the authors of most modern lexica of other Semitic languages have abandoned the root-ordered paradigm and have now opted for a strict alphabetical listing of the entries.[84] While Delitszch’s *Assyrisches Handwörterbuch* of

78 The unattested abbreviation for this dialect in *LS*¹ is either ‘nh.’ (i.e. Neuhebräisch; see, e.g. √ܓܡܙ [p. 120]) or ‘n.h.’ (see, e.g. √ܠܚܝ [p. 368]). It may be pointed out here that Brockelmann occasionally quotes Rabbinic Hebrew material derived from Levy, *TMW*, erroneously as ‘AR,’, since this dictionary includes interspersed Hebrew and Aramaic material. See, e.g. the entries: ܛܠܝܠܝܬܐ carpet (p. 274) – for: jar טלי, read: nh. טלאי; ܟܘܫܐ spindle [p. 324] – for: jar, read: nh. כוש; ܠܫܠܫܐ mucus [p. 371] – for: jar. לשלשתא, read: nh. לשלשת; ܡܪܨܘܦܐ bag [p. 405] – for: jar מרצוף, read: nh. מרצוף.

79 The most comprehensive work dealing with Syriac cognates in this dialect is Y. Gluska, *The Influences of Aramaic on Mishnaic Hebrew*, 2 vols., Ph.D. thesis, Bar Ilan University, Ramat Gan 1987 (Hebrew); See also: Idem, *Hebrew and Aramaic in Contact during the Tannaitic Period: A Sociolinguistic Approach*, Tel Aviv 1999 (Hebrew).

80 On this topic, see: E.Y. Kutscher, ‘Mittelhebräisch und Jüdisch-Aramäisch im neuen Köhler-Baumgartner’, *Hebräisches Wortforschung, Festschrift zum 80. Geburtstag von W. Baumgartner*, Leiden 1967, pp. 158 – 175. It should be stressed here that the vocalizations given for both Hebrew and Aramaic words in the Rabbinic dictionaries are mostly speculative reconstructions made by the authors of these works. The only reliable sources for the vocalization of Rabbinic Hebrew are old vocalized manuscripts (e.g. the Kaufmann Ms. of the Mishna; Ms. Vat Heb. 66 of Sifra; Geniza mss. of various compositions).

81 Examples of the common lexical tradition of the Gaonic authorities and the medieval Syriac lexicographers concerning words occurring in both Rabbinic Hebrew and Syriac can be found in: J.N. Epstein, *Der Gaonäische Kommentar zur Ordnung Tohoroth*, Berlin 1915, pp. 61 – 67.

82 See e.g. ܫܥܒܕ and its derivatives, s.v. √ܥܒܕ [p. 506]; ܣܪܗܒ and its derivatives, s.v. √ܪܗܒ [p. 717].

83 On Brockelmann’s solution for this problem found only in *LS*¹, v. *supra*, n. 30.

84 This was already done in the mid 19th cent. by Levy, *TMW*, for Rabbinic Hebrew and the Jewish Aramaic

1896 still used the root-ordered system, because of the large number of Sumerian loanwords in Akkadian, all of the modern Akkadian lexica have opted for the alphabetical order. The same is true for all the modern dictionaries of Biblical Hebrew, Rabbinic Hebrew, and the Jewish Aramaic dialects.

5.5.3 In line with this trend, the present writer has re-arranged all of the entries according to a strict alphabetical order, while the original page of *LS*2 is given at the end of each entry.[85]. The root of each non-verbal part-of-speech is indicated in the entry, and the derived words for each root are given in the main root entry of the verb in order to make it possible for the reader to survey the semantics of a root and its derivatives.[86]

5.5.4 The order used for the main verbal stems in *LS*2 was: Pe., Etpe., Pa., Etpa., Af., Ettaf., and each stem was followed by the words supposedly derived from it. In practice, this meant that the information for commonly occurring verbal roots was spread out disjointedly over several pages. In the present work, all of the material concerning a verbal root has been brought together according to the following stem order: Pe., Pa., Af., Etpe., Etpa., Ettaf.

5.5.5 Sub-entries are indicated by a dash and an indentation following the main entry.[87]

5.6 Homographs

5.6.1 Because *LS*2 is arranged by roots, many homographs occur in widely scattered places and hence are not distinguished. Since the alphabetical ordering employed here now brings them together, they have been numbered according to the following principles:

1. Separately according to part-of-speech
2. Separately according to consonants for verbal roots and by vocalization for other parts-of-speech

5.7 Internal Division of Entries

5.7.1 *LS*2 tends to minimize the internal division of entries, but this has been expanded in many entries for the sake of clarity.

5.8 References in the Morphological Section

5.8.1 *LS*2 tends to give non-standard forms of an entry in the morphological section which are not cited later in the semantic one.[88] Since the present work is more expansive, these references have generally been moved to their proper location in the semantic section where their text is cited.

5.9 Parts-of-Speech

5.9.1 In general, *LS*2 does not indicate parts-of-speech, apparently on the assumption that they are self-evident. Since the distinction between nouns and adjectives in Syriac is semantic and syntactic, but not morphological, these two parts-of-speech were combined together in the same entry in *LS*2. While this has been retained in the present work, internal distinguishing rubrics have been added. Adverbs were also often subsumed in the adjectival

dialects.

85 An entry for which there is no page in brackets at its end was not originally in *LS*2

86 This ordering is strictly synchronic and makes no attempt at determining priorities.

87 The treatment of sub-entries in *LS*2 is haphazard and inconsistent. Thus, many compounds of ܒܝܬ are given under the entry of the *nomen rectum* and not as sub-entries of the *nomen regens* ܒܝܬܐ, and this has not been changed here. On the other hand, the sub-entries under ܒܝܬܐ were originally sub-divided into a large number of semantic categories which made finding a particular compound nearly impossible. This has now been abandoned for a strictly alphabetical ordering.

88 E.g., variant orthographies, abs. forms, irregular pl. forms.

entry, and these have been given separate entries here. All other parts-of-speech have been marked at the beginning of an entry.

5.10 Vocalization

5.10.1 Like most other West Semitic alphabetical texts, nearly all Syriac texts have been transmitted unvocalized. As a result, the vocalizations and stem determinations appearing in the Syriac dictionaries – including *LS*² – are to a great extent based on the lexicographer's analyses of the words and not on an ancient tradition.[89]

5.10.2 Brockelmann often utilized the following indicators in *LS*² to establish the vocalizations:

1. Masoretic notes appearing in specialized works dealing with the correct reading of the Bible[90]
2. Masoretic notes appearing in Barhebraeus' commentaries to both OT and NT and in his grammar
3. Vocalized biblical texts[91]
4. Vocalized printed texts of various types, e.g. the Roman edition of Ephrem's works; the texts published by Bedjan with his vocalization
5. Prosodic considerations for words occurring in poetry

5.11 Fonts

5.11.1 Traditionally, following the Roman printings of Syriac texts, both modern grammars and dictionaries have been printed in Serṭo type with WSy vocalization irrespective of their original ductus. Following the discovery in the 19th cent. of old Syriac manuscripts written mainly in Estrangelo, most European academic text publications used this font. Texts published by the American missionaries in Turkey and by Bedjan in Europe utilized the Nestorian font and ESy vocalization, while those printed by the Lebanese presses used the Serṭo font and WSy vocalization.

5.11.2 Following an increasing academic trend of the last few years, the present work has utilized Estrangelo fonts and ESy vocalization.[92]

5.12 Additional Entries and Meanings

5.12.1 Since the purpose of the present work was not to produce a new Syriac dictionary, the writer did not comb the literature to find new entries and meanings.[93] However, an exception was made for two important lexical articles: Juckel, Harklean and Schleifer.

5.12 Indices

5.12.1 Two electronic indices accompany this book:

1. An **Index of Passages** for all text citations
2. An English-Syriac **Index of Meanings**

89 I.e. according to the understanding of the word to which a nominal stem is related by morphological criteria and the meaning of the verbal stem. Brockelmann's vocalizations have been strictly followed in this translation.

90 *LS*² often points out the different WSy and ESy traditions.

91 *LS*² follows the Urmia edition for OT and the New York edition for NT.

92 It should be noted, that in spite of Brockelmann's use of WSy vowel signs, for etymological reasons, he employed ESy [*e*] for WSy [*ī*] and ESy [*o*] for WSy [*u*] against the Western tradition.

93 Note Brock's comment: "The great strength of Brockelmann's *Lexicon* lies in the references he gives for rarer words: only rarely does one come across an unusual word in a published text whose occurrence Brockelmann has not caught." (*op. cit.*, n. 6), p. 167.
